Biden's Semiconductor Plan Flexes the Power of the Federal Government

- Chip makers seeking subsidies will need to ensure affordable child care for their workers, limit stock buybacks and share some profits with the government.
- The new requirements represent an aggressive attempt by the federal government to bend the behavior of corporations to accomplish its objectives.

Kenny Holston for The New York Times

Beth Collier

It's the Cool Season in Death Valley

Scorching heat is the norm at this national park, but winter and early spring offer a chance to see the snow-capped peaks, salt flats and volcanic hills.
